Conference program cover, and all associated DOPE 2020 promo, designed by Katie Losekamp and Helen Richardson.
Welcome to DOPE 2020

The Political Ecology Working Group, an interdisciplinary collective of University of Kentucky graduate students, has organized the Dimensions of Political Ecology Conference since 2011. The success of this annual summit – known widely as DOPE – has always relied on generous sponsors and keen participants. The organizers of the 2020 conference welcome y’all to DOPE 10 and thank you in advance for your contributions!

*Bury Us On the Mountaintop: A Political Economy Analysis of Extraction, Illness, and Displacement in Appalachian Kentucky*
A convergence of ecological, social, economic, health, and political problems converge in rural America currently—from climate crisis to racism, poverty to malnourishment, disparity to inequity. Agriculture stands as both a driver of these issues—and a potential path out. What is the role of academia in understanding and overcoming these agrarian challenges? Specifically, how could engaged, critical, community-partnered scholarship assist frontline communities and farmers toward resilience, nourishment, and justice? This panel explores the agricultural cooperative extension system as a useful model for academia at large (Chappell and Graddy-Lovelace, under review). Coop extension grapples with its own histories of coloniality and discrimination—its unidirectional pipeline model enabling overproduction and consolidation. It also remains under-resourced and unnecessarily separated from other realms of academia. Accordingly, this panel honors the coop extension premise and commitment to public good agriculture and rural well-being—even as it asks how this model could be expanded to scholars beyond the land grant system. Specifically, the panel explores the roles of: 1) antiracism and antiracist training, 2) gender diversity and female leadership, and 3) narrative, ancestral stories, and literature—in broadening and deepening cooperative extension service. Geographically, the panel addresses Appalachian agrarian struggles and movements—as well as the overlooked histories, geographies, and futures of Black and Indigenous agricultures in Kentucky, Appalachia, and beyond.

This panel examines the need for extending and expanding agricultural cooperative extension service (CES) models, which center farmer needs with partnerships from scholars, community educators, and local networks (Chappell and Graddy-Lovelace, under review). We ask: how do historical and literary narratives of place inform and
Session Block 1
8:30 AM – 10:10 AM

shape contemporary agrarian justice movements? How can CES serve as a place for the leadership and innovation of Black and Indigenous women; and significantly, how can academic scholarship seriously undertake and support, expand and actualize the emancipatory potential of agricultural cooperative extension for agrarian justice and flourishing?

7. Imagined Geographies of Movement, Migration, and Citizenship
(Panel)
Room 225

Organizer(s): Meagan Harden (University of Oklahoma), Maddie Williams (University of Oklahoma)

Chair(s): Maddie Williams (University of Oklahoma)

This session explores the political ecologies of movement, migration, and citizenship that produce imagined geographies of home. The panel presents work that disrupts conventional scales of analysis and investigates the lived, embodied experiences of migrants as they engage with dynamic imagined geographies of home. Maddie Williams presents an analysis of the relationship between food, diaspora, and imagined histories in Mongolia; Amber Dock investigates the conceptualization and internalization of segregation by residents of historically redlined neighborhoods in Louisville; Meagan Harden traces relational shifts in how Burmese women resettling in Oklahoma City experience nationality and ethnicity following migration; and Helen Richardson examines the role of faith-based organizations in Eastern Africa in constructing disembodied imaginaries of refugees and inhibiting coordinated relief efforts. Following each panelist’s presentation, the group will respond to a series of prepared questions, before engaging in a more open-ended discussion of political ecologies of dislocation, dispossession, and diaspora.

Rebecca Elmhirst, PhD (University of Brighton)
Gatton Student Center, Worsham Cinema

Dr. Rebecca Elmhirst is a human geographer and political ecologist, with two decades of research and teaching experience on struggles over environmental governance, migration and social justice in the global South.

Most of her work is in partnership with scholar-activists in Southeast Asia, with whom she has developed various programmes of research and teaching. These include current projects on the gender dimensions of oil palm investment in Indonesia, links between migrant remittances, livelihoods and resource access, and on living with floods in a mobile Southeast Asia. She is a Principal Investigator in the WEGO (Wellbeing, Ecology and Gender) MSCA Innovative Training Network on feminist political ecology.

Rebecca is a member of the Centre of Excellence for Spatial, Environmental and Cultural Politics and for Aquatic Environments. She also sits in the Society, Space and Environment research group. Rebecca has published more than 40 journal articles and chapters, co-edited three books and contributed to popular publications. Her research has been funded by the Economic and Social Research Council, the British Academy, the European Commission, the Research Council of Norway and European Commission Horizon 2020.

22. Critical Methodologies in Urban Political Ecology: Empirically Grounded Research Applications in Louisville and Beyond (Panel)

Room 221

Organizer(s): Amber Dock (University of Louisville), Danielle Rohret (University of Louisville)

Chair(s): Amber Dock (University of Louisville), Danielle Rohret (University of Louisville)

Political ecology has been traditionally applied in rural contexts such as Appalachia, and a glance at this year’s sessions shows that this continues to be the case. In contrast, this panel follows a more recent trend in Anglo-American Geography to consider the political ecological dimensions of the urban (Zimmer, 2010). In so doing, we interrogate the enduring binaries of society-nature and city-countryside (Wachsmuth, 2012) to show how urban political contestations continually reshape society’s interface with nature. The research showcases a range of critical methodologies we find aptly suited to DOPE’s project. This research recognizes the complexity of the urban socio-ecological environment, and employs mixed methods that are all grounded, iterative, and reflexive.

23. Scholar Activist Praxis in the Political Ecologies of Appalachia (Panel)
Room 129

Organizer(s): Gabe Schwartzman (University of Minnesota), Charlee Tidrick (University of Virginia)

Chair(s): Gabe Schwartzman (Geography, University of Minnesota)

To study political ecology and environmental politics in the Appalachian region involves an engagement with, and often direct collaboration with, struggles for environmental and economic justice. Yet, terms like scholar-activism and community engaged research often generate more questions than answers. The work of a scholar to produce politically useful knowledge, to maintain relationships with ongoing social movements, and remain accountable to the communities they work with is anything but straightforward. This panel asks scholars that have written about and organized around questions of political ecology, environmental politics and Appalachian politics how they have grappled with questions of scholar activism in their own work. Panelists will discuss their experiences as scholars navigating community research collaborations, supporting social movements, and informing political activism in the region with their work. The panel builds on the earlier paper session organized around similar themes.

From the 1978 Appalachian Land Ownership Survey to the Foxfire volumes, collaborative ethnographic methods and research-based education have been hallmarks of Appalachian Studies and studies of Appalachia. Appalachian Studies is a theoretical wellspring for collaborative methodologies, where studies have re-grounded expertise in practicing, writing, and applying ethnography to the social, economic, and environmental issues confronted by community partners. Despite a concurrent history of prescriptive, distanced academic study that has mis-understood, mis-represented, and marginalized communities, Appalachian voices continue to ring out through collaborative, community-driven projects that link grassroots community organizations, activists, artists, and teachers and students from academic circles.

This session will consider on-going contributions to this tradition through ongoing service-oriented experiential education within collaborative frameworks at the university level. Representing institutions and collaborative projects from Southern, Central, and Northern Appalachia, contributors will give five-minute lightning talks summarizing their educational programs and collaborative impacts. The session will then open up for discussion between participants and audience members to discuss methodological strengths and weaknesses and how geographic differences and similarities bear on such collaborative projects.

Chair(s): Annelise Straw (American University), Nathan Erwin (American University)

From kindergarten through their senior year, school students are exposed to the unspoken complexities and power dynamics of the food system. This session seeks to explore the political ecology of food, school gardens, and food education through a decolonial pedagogy. School gardens can serve as mechanisms of oppression; however, this session works to decolonize both food education and the broader food system by placing academics and practitioners in dialogue with one another. Themes discussed include the erasure of agricultural knowledge within the food system, critiquing the coloniality of school gardens, and digging into the reasons school gardens often fail. Underpinning this discussion is the acknowledgement that food education is racialized and that school gardens can serve as spaces of whiteness. This panel discussion, where academics sit beside expert-practitioners, is a commitment to community-scholar collaboration and intends to facilitate equitable conversation with the intent of producing an ongoing working group.

Johari Cole-Kweli, MBA. Cole-Kweli is currently a partner with C&T Smith LP, a company focusing on restoring food integrity and safety in today’s food system; and owner and operator of an organic farm in Illinois. She also works as a consultant and Community Liaison for Chicago’s Field Museum and the U.S. Fish & Wildlife Services on environmental conservation, education and community relations.

Elaine Losekamp. Losekamp is a student at Western Kentucky University studying Agriculture, Spanish, Geography, and Nonprofit Administration. She is the founder and president of WKU’s chapter of the Food Recovery Network, is on the Food Recovery Network Student Alumni Advisory Board, and serves as the Food Recovery Verified Intern. Elaine also works for Kentuckians for the Commonwealth, canvassing and phone banking for the 2019 elections, fighting for a sustainable, more equitable future for Kentuckians.

Alice Melendez. is a local environmental activist in Kentucky. Since her time in Houston working in the Occupy movement, Alice has built an extensive network with people working in sustainable food, community and transition; with people interested in coalition building in Louisville to push the local activist ecosystem into more impactful alliances and radical demands; with the earth skills and herbalist teachers and learners who organize the Whippoorwill Festival; with thoughtful anarchists focused on neighborhood-scale mutual aid.

Ashley Smith. Smith is the co-founder of Black Soil: Our Better Nature, which is Kentucky’s premier agritourism company specializing in concierge, education and tourism initiatives, which serves to reconnect black Kentuckians to their legacy and
heritage in agriculture. Smith currently serves as Director of Education and Governmental Affairs. Combining her 16 year career spanning diverse sectors, Smith will lead the agencies efforts in educating and supporting key stakeholders on Fayette Alliance’s pillars of advocacy.

MODERATOR

Keiko Tanaka, PhD. Dr. Tanaka is a Professor of Sociology at the University of Kentucky. Dr. Tanaka’s research examines various aspects of sustainable agriculture and food systems. Her current projects on beginning farmers in the Southeastern US and in Japan concern the intersection of farmers’ knowledge, practices and perspectives on agricultural sustainability.

We are convening a group of early career scholars interested and invested in building a long-term writers' community. The workshop is intended for researchers at any stage of a book-length project situated within the broad, interdisciplinary area of political ecology. The workshop will offer a supportive and critical space in which to discuss the writing process, to ask questions and offer advice, and to engage critically and generously with each others' writing. For this first meeting, we will discuss Helen Sword's *Air & Light & Time & Space* (2017), which proposes four cornerstones – Behavioral, Artisanal, Social, and Emotional – that anchor successful academic writing. In this inaugural workshop, we are bringing together 8 scholars to share either a book proposal or a book chapter with the group. *This is a closed workshop for participants who applied to our Fall 2019 CFP.*

In this practice-oriented workshop, we will explore two ways political ecologists can engage digital methods to understand, represent, and contextualize questions around state and corporate accountability and socio-environmental justice. Inspired by the notion of “public political ecology” (Osborne 2017), we assess the intersection of the digital as “object and subject of geographical inquiry” and in particular how an expansive approach to data practice might contribute to reformulating political visibilities (Leszczynski 2017, 1; J. Gray et al. 2018; Moore et al. 2018; Foo 2019).

We will first engage with interactive web mapping platforms and their use in environmental justice, land rights, and resource struggles. Political ecologists have long drawn on GIS and cartographic techniques, including participatory and counter forms of mapping (Peluso 1995; Weiner et al. 1995; St. Martin 2001; Harris and Hazen 2009). Maps and mapping can provide empirical avenues into core political ecology concerns around the politics of knowledge (Turner 2003; McCarthy and Thatcher 2017; N. Gray 2018), while also playing a part in reconfiguring conditions of power (Peluso 1995).

37. DOPE at 10: A participatory forum to discuss where we’ve been and what’s next (panel)
Room 218/219

Organizer(s): Hugh Deaner (University of Kentucky)

Moderator(s): Lilian Brislen (Food Connection, University of Kentucky)

Ten years ago a collective of University of Kentucky graduate students asked two simple questions: *If we host a nature-society conference grappling with new ideas and exploring new ways of engaging, but without promise of professional advancement or hierarchy climbing: Who would come? What would it become?* No one imagined the Dimensions of Political Ecology conference would become so impactful and enduring. We invite you to participate in this Q&A/discussion forum facilitated by DOPE founders and early organizers to help determine what kind of space (critical, intellectual, activist, solidarity, social, etc) DOPE has been, is, and can or should be.

40. Early Career Scholars’ Writing Workshop (Session II) (pre-registration required)
Room 205

Organizer(s): Sophie Sapp Moore (University of Wisconsin-Madison) & Jared Margulies (University of Alabama)

Chair(s): Sophie Sapp Moore (University of Wisconsin-Madison) & Jared Margulies (University of Alabama)

We are convening a group of early career scholars interested and invested in building a long-term writers' community. The workshop is intended for researchers at any stage of a book-length project situated within the broad, interdisciplinary area of political ecology. The workshop will offer a supportive and critical space in which to discuss the writing process, to ask questions and offer advice, and to engage critically and generously with each others' writing. For this first meeting, we will discuss Helen Sword's Air & Light & Time & Space (2017), which proposes four cornerstones – Behavioral, Artisanal, Social, and Emotional – that anchor successful academic writing. In this inaugural workshop, we are bringing together 8 scholars to share either a book proposal or a book chapter with the group. This is a closed workshop for participants who applied to our Fall 2019 CFP.

46. In the classroom and beyond: Ten Years of DOPE (a round table discussion)

Room 118/119

Organizer(s): Lisa Cligett (University of Kentucky)

Chair(s): Lisa Cligett (University of Kentucky)

This roundtable discussion will reflect on what we (as critical social scientists and scholars) have learned from ten years of the Annual DOPE (Dimensions of Political Ecology) conference held at the University of Kentucky. Participants in this session enrolled in an Anthropology graduate seminar (ANT 736) in Fall 2020 that took DOPE as its central organizing principle. Over the course of the semester, we engaged the scholarship of each year of DOPE, considering the work of key speakers, and examining themes emerging from each meeting. Roundtable participants will reflect on how this body of Political Ecological scholarship intersects with their research interests and disciplines, including Anthropology (and Archaeology), Geography, Health Communication, and Community and Leadership Development. We will encourage audience participation, and anticipate that colleagues who have attended DOPE meetings over these ten years will be active contributors to the discussion.

Title TBA

Alaka Wali, PhD (Curator, North American Anthropology in the Science and Education Division of The Field Museum)

Worsham Cinema, Gatton Student Center – 160 Avenue of Champions

Dr. Alaka Wali was the founding director of the Center for Cultural Understanding and Change from 1995-2010. During that time, she pioneered the development of participatory social science action research and community engagement processes based in museum science to further access of museum resources for excluded communities. Before joining the Museum, she worked with Dr. Leith Mullings to document the consequences of structural racism on black women’s reproductive and social health in Harlem, N.Y. Currently, she curates the North American collection, comprised largely of material culture of Native Americans from the late 19th century to the present and works closely with colleagues to implement environmental conservation programs that privilege economic and cultural autonomy for politically marginalized people in both Chicago and the Amazon regions of Peru. Her research focuses on the relationship between art and the capacity for social resilience. Alaka was born in India and maintains strong ties to her birth homeland.

Keynote Address Supported by the UK Year of Equity
2019 marks the 70th Anniversary of Lyman T. Johnson’s successful lawsuit to integrate the University of Kentucky. To commemorate this historic moment, UK is hosting a series of events for the 2019-20 Year of Equity. We are so grateful to have the support of a Year of Equity grant in supporting our keynote address by Dr. Alaka Wali. This event is open to the broader community, so we encourage DOPE attendees to arrive a few minutes early to secure a seat.
**After Party**

*7:00 PM – Late*

**Al’s Bar of Lexington**

601 North Limestone

Join the organizers and other participants for a post-conference celebration! Al’s Bar of Lexington is well-known venue offering craft draft beer and many Kentucky bourbons. There will be a Rise Up Pizza food truck outside of Al’s from 7:30-9:30 pm, selling individual pizzas at affordable prices. They use a sourdough crust made from KY-proud flour and local ingredients. There will be a variety of pizza options including vegan and vegetarian options. If these options do not suit your dietary needs, other food options can be brought into Al’s.
Thanks for attending DOPE 2020, y’all!
Join us in 2021 to celebrate DOPE’s 11th anniversary.
